DRYQCK™

超快吸水速干纤维

Moisture absorbent quick drying fiber
瞬間吸水速乾纖維

瞬间吸湿
Moisture absorption

超快速干
Quick dry

抗菌防臭
Anti-bacterial & deodorant

功能持久
Functional persistence

专业的功能纱线供应商

PROFESSIONAL FUNCTIONAL YARN SUPPLIER

DRYQCK™

超快吸水速干纤维

Moisture absorbent quick drying fiber
瞬間吸水速乾纖維

纤维简介/纖維のご紹介

Fibre information

▶ 利用纤维截面异形化使纤维表面形成凹槽，借助凹槽的芯吸导湿结构，迅速吸收皮肤表层湿气及汗水，并瞬间排出体外，再由表面纤维将汗水扩散并迅速蒸发掉，从而达到超快吸湿排汗、调节体温的目的，使肌肤保持干爽与凉快。

With the help of the core moisture absorption and moisture conduction structure of the groove, the moisture and sweat of the skin surface are quickly absorbed, and are instantly discharged from the body. Then the sweat is diffused and quickly evaporated by the surface fiber, so as to achieve the purpose of moisture absorption and sweating and temperature regulation, so as to keep the skin dry and cool.

特殊な纖維断面形状により纖維表面に溝を形成し、この溝の吸湿・排出構造により、肌表面の湿気や汗を素早く吸収・排出します。体の表面の纖維が汗を拡散し、素早く蒸発させることで、超高速の吸湿と発汗、体温の調節、肌をドライで涼しく保つという目的を達成します。
